SPA & RESORT

Imagine sitting in one of our private deck chairs. See the bright blue sky and ocean in sharp contrast to our alabaster hotel, and rows of palm trees bowing contently. Welcome to our truly rejuvenating water space.

The design concept of this hotel is an homage to the Mexican architect, Luis Barragan. The spaces in the hotel structure, blessed with abundant natural light, create sometimes majestic and sometimes tender atmosphere. The resort-like feel unique to this hotel is created by the contrast between bright cheery colors and the quiet colors that blend with the building, hard colors and soft colors, which will become an unforgettable background of your trip.

Luis Barragan (1902-1988)

Barragan is one of the most renowned Mexican architects. With the unique color sense and architectural philosophy, he developed architectural designs that bring fresh surprise and impressive tension to the space, create perfect harmony with the surrounding landscape and achieves a fine balance between natural light and water. He once said that a perfect garden should enclose the entire universe. Such philosophy can be actualized nowhere else but here at The Luigans, which "boasts a superb location" or "boasts this superb location".
