Tremble with Excitement

Anticipations toward the Schoolteachers and Children
Looking forward to our Educational Activities

Uneasiness

Concern about our Institutional Environments
Functional Powers to Carry out Important Job

satisfactory results step by step

● **full use of our attractive space materials**
to carry out our activities to candle a bright flame in children's hearts
to respect Mother Nature and the lives of all creatures on earth
to hope for bright future

● **guided by school teachers on their love for children**

“Why does the moon show us
the same side of face all the time?”

The mediocre teacher tells.
The good teacher explains.
The superior teacher demonstrates.
The great teacher inspires.
----- William Arthur Ward -----

“Because periods of rotation and revolution are equal”
Role-Play → “Still any more question?” as if “that’s quite enough!”,
“Uh.....Why is it so important that the moon shows us the same side?”

“What’s important is to bring out children’s interest”

April 12, 1955

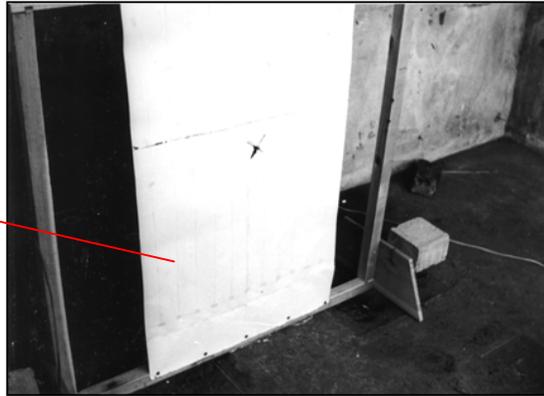

thin wires

steel, duralumin, brass

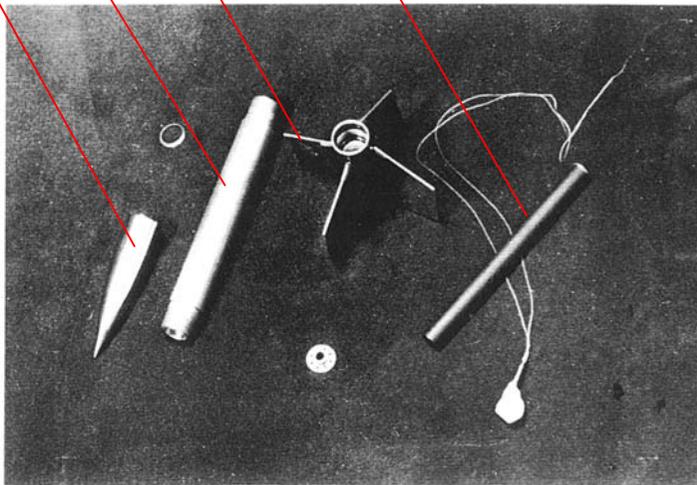

body

tails

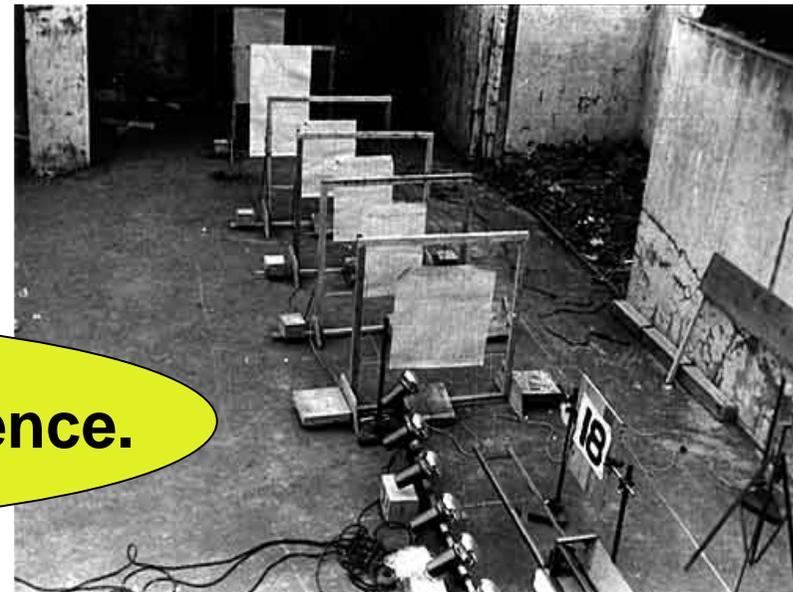

fuel

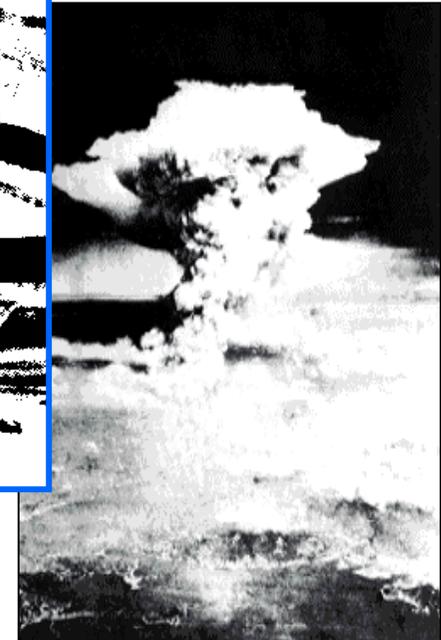

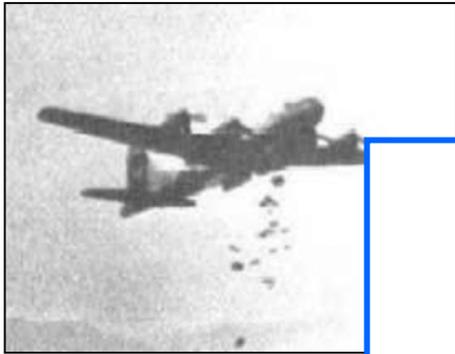

“Pencil” and Prof. Itokawa

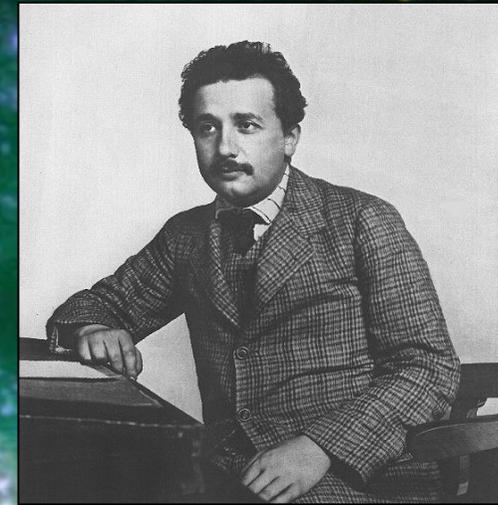

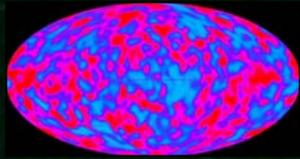

We can share the experience.

The oldest memory of mine in my whole life = the back of my mother

“Life is Precious”

**Preciousness of our lives as latest creatures
in a process of long-long history of space**
