### Information furnished in conformity with the Convention on Registration of Objects Launched into Outer Space

#### Note verbale dated 23 February 2011 from the Permanent Mission of France to the United Nations (Vienna) addressed to the Secretary-General

The Permanent Mission of France to the United Nations (Vienna) presents its compliments to the Secretary-General of the United Nations and, in accordance with article IV of the Convention on Registration of Objects Launched into Outer Space (General Assembly resolution 3235 (XXIX), annex), has the honour to submit information on space objects launched by France during the period from 1 January to 31 December 2010 (annex I), information on space objects registered by France that have re-entered the Earth's atmosphere during that period (annex II) and supplementary information on France's previously launched space objects (annex III).

The Permanent Mission of France has the further honour to inform the Secretary-General that the French National Registry of Objects Launched into Outer Space currently contains entries for 262 space objects. Of those objects, 84 are satellites (of which, 41 are operational) and 178 are component parts of launchers, such as launcher stages and carrier structures.
