# Heavy & Civil Construction 大型土木工程

## Productivity & Process Control

更快的项目完工、施工过程控制

## Cost Control

减少投入成本: 燃料, 返工, 劳动力

## Safety

增加安全性

## Environment Impact

降低环境影响

### Machine Control

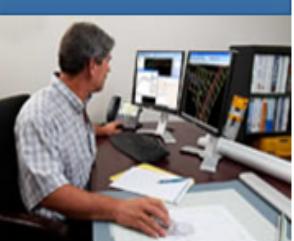

### Paving Control

### Site Positioning

### Software Solutions

### Marine Positioning Solutions

### Marine Construction Software

Grade Control that is faster, more accurate and minimizes rework.

Increase paving accuracy and smoothness while minimizing asphalt usage.

Measurement, stakeout, quality control and progress monitoring on the job site.

Manage fleets and assets, perform takeoff and data prep, collaborate and stay connected with software powered by Trimble.

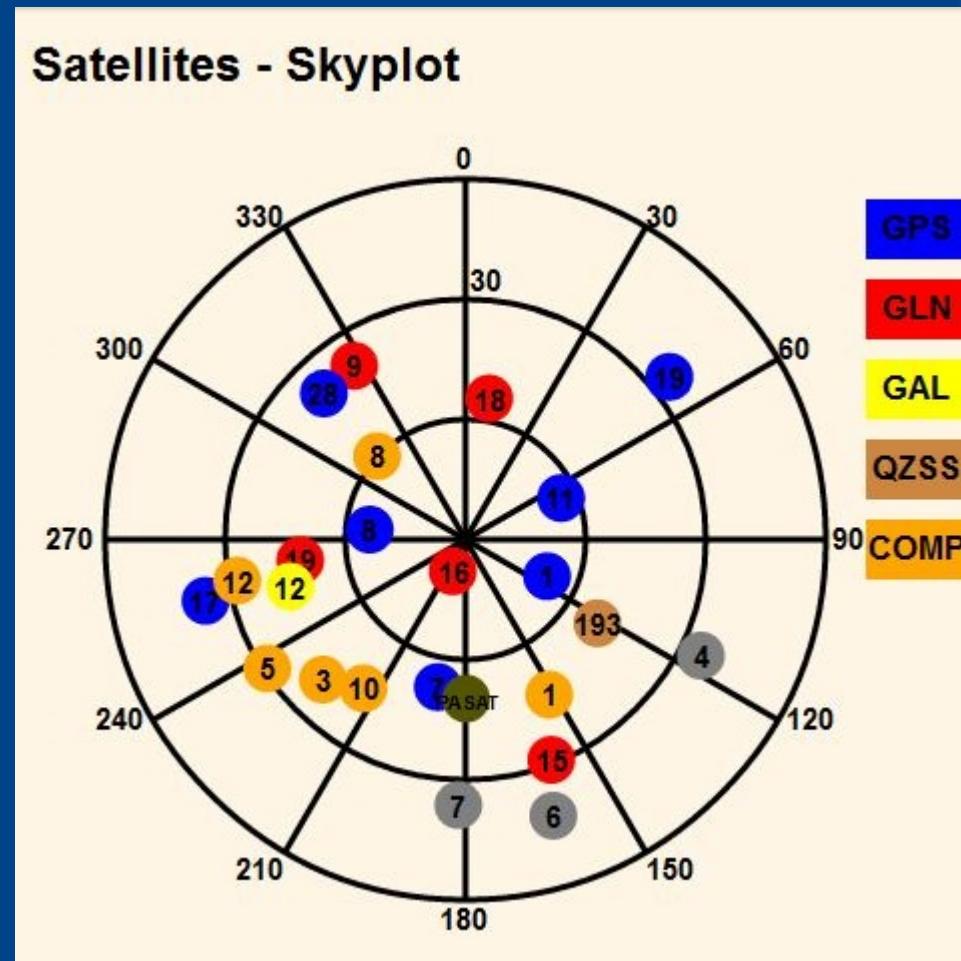

Trimble Marine GNSS receivers and antennas provide position accuracy to suit most marine construction applications - up to precise centimeter accuracy.

Trimble HYDROpro™ and SCS900 Site Controller Software offer workflows for all phases of on-shore and off-shore marine construction.

# Machine Control System 机械控制系统

# GNSS 全球卫星定位系统

# GNSS in Construction 施工中的GNSS应用

- cm level real-time precision 厘米级实时定位
- All connected: design to finish 联合作业-设计到完工

# Applications in China 在中国的应用案例

Railway 铁路: 智能压实

兰新铁路

Dam 水利: 毛尔盖大坝

Ag: 农业: 自动驾驶

Bridge 杭州湾大桥

Canal 水利: 南水北调

# Agriculture: Auto-Pilot 农业机械的自动驾驶

## HeIongjiang Farm: 黑龙江农场

- Longer work hours
  - 增长作业时间
- 24 hours operations
  - 24 小时作业
- Reduce fatigue
  - 减少劳动强度

# Hangzhou Bay Bridge 杭州湾大桥

- VRS Stations
- 建立了VRS站
- RTK from Construction to Maintenance
- 从建设到维护
- Monitoring
- 监测

# Subgrade Compaction 路基压实

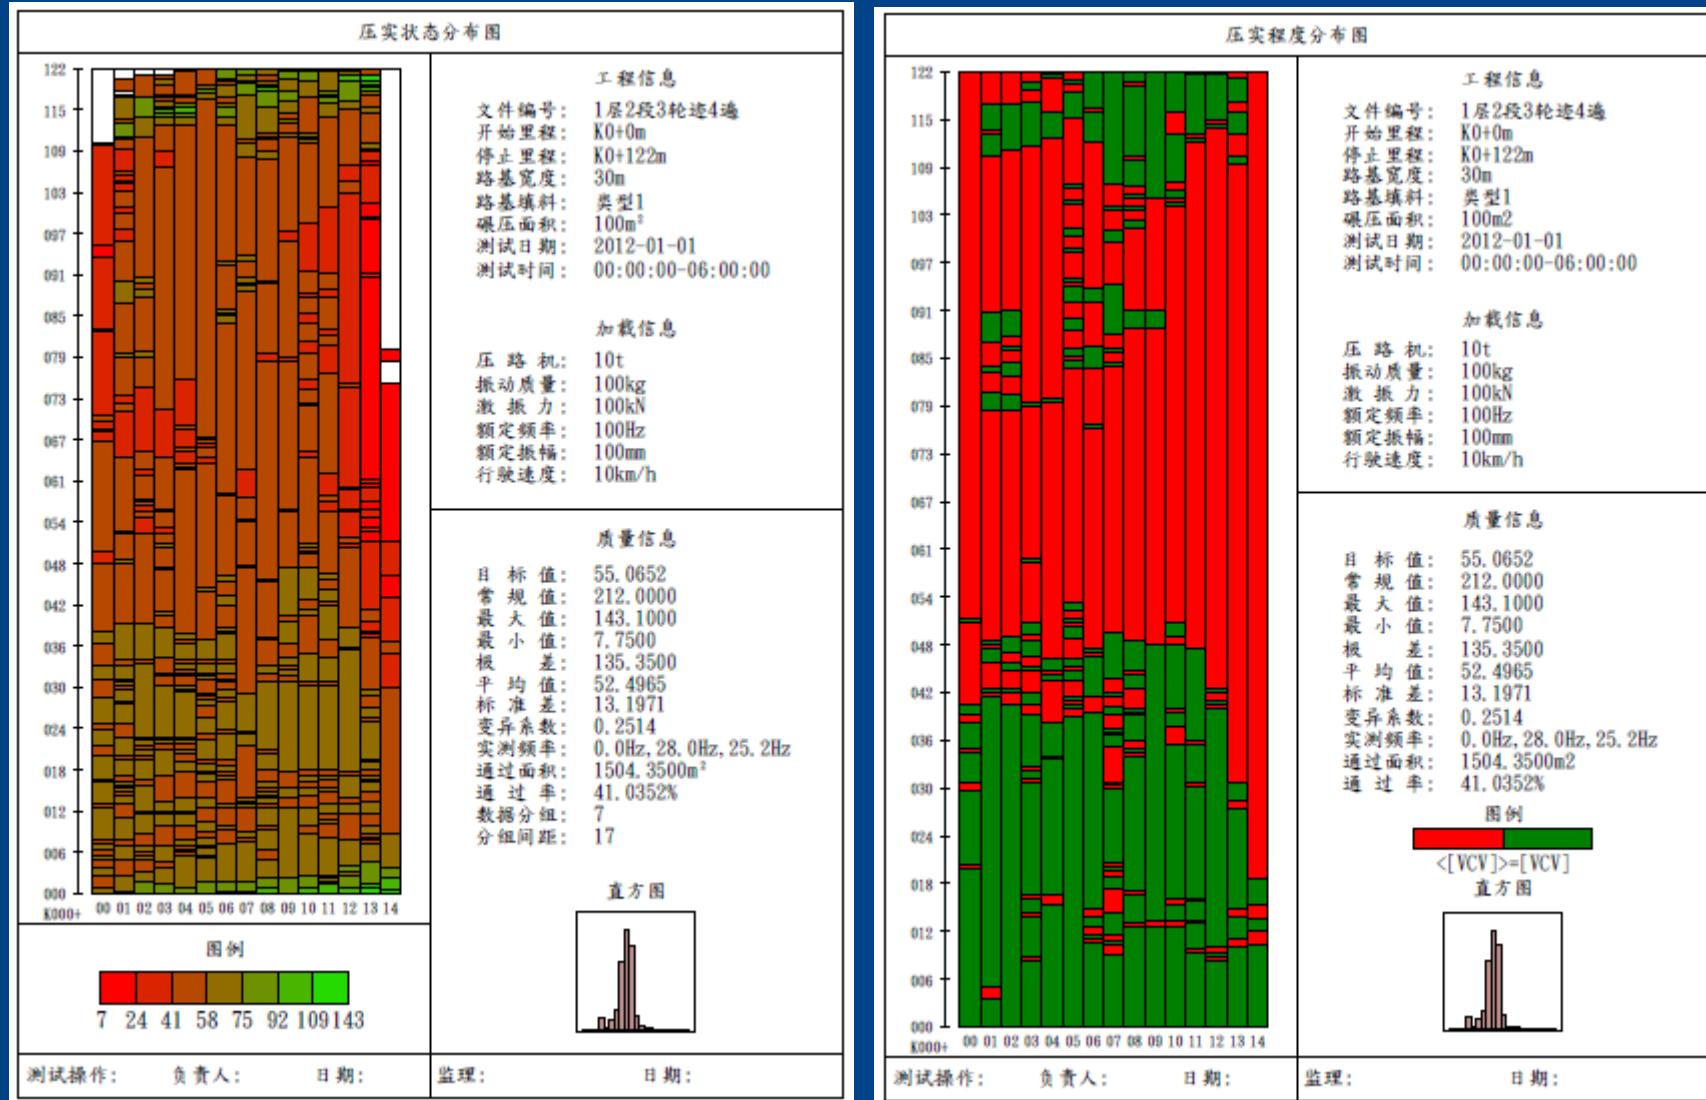

# Smart Compaction System

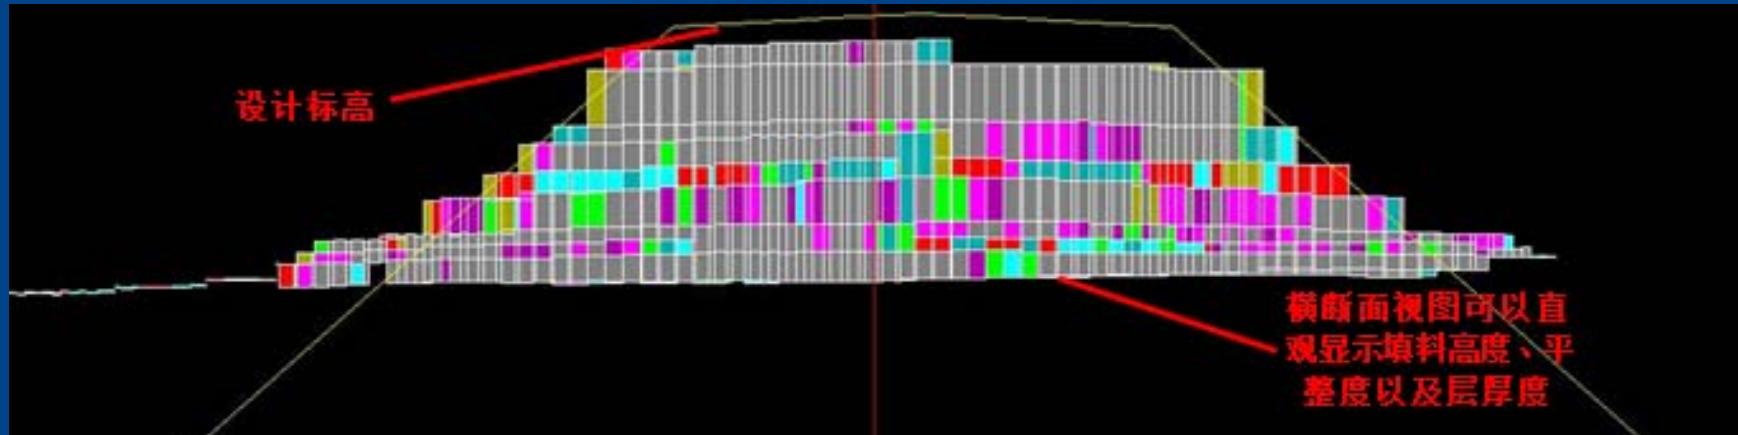

## 智能压路机系统

# Compaction Report 压实报告

# Process Control 过程控制

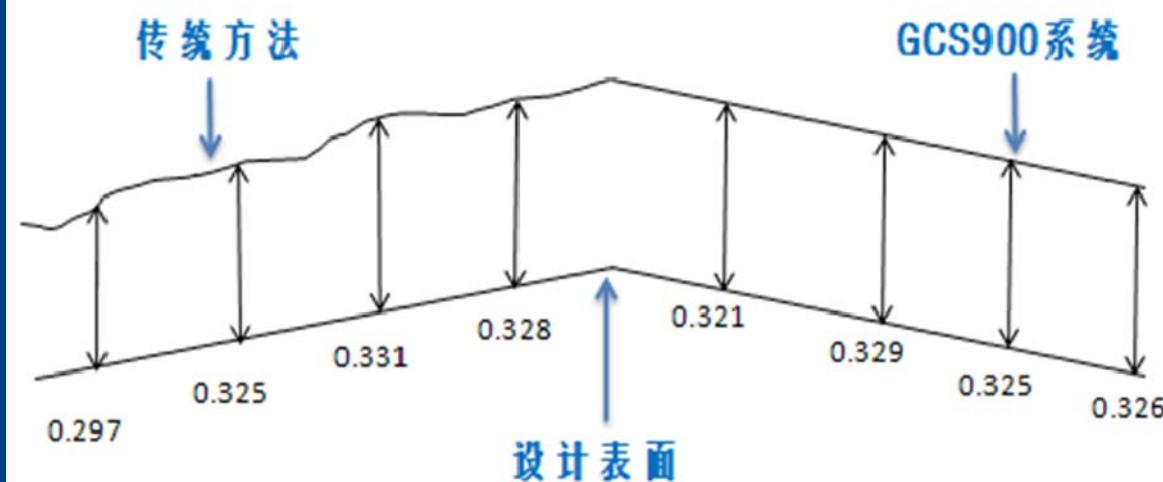

## Testimonial 1 用户评价 1

- During the night time, the operator can rely on the control box to guide the operation in straight lines so to avoid any compacting quality issues
- “智能压实系统能够辅助机手夜间施工。有了智能压实系统，机手可以依据驾驶室内的控制箱中显示的轨迹行驶，很容易沿直线工作，这样就避免了碾压过程中漏压、少压，提高了工作效率。”

## Testimonial 2 用户评价 2

- With the compaction system, each bureau can monitor the project progress, workload, and quality. The compaction data and report can avoid any over or missing compaction issues.
- “通过应用这套系统，可以很好的把握各个局自己的施工进度和工作量，控制下面分包队伍的施工质量。通过碾压变数的统计，能很好的防止过压和漏压。”

# Subgrade Leveling 路基智能平整

# Canal Construction 水利沟渠施工

- Finish the job once for all 一次成型, 减少返工
- Speed up with better process control 缩短工期、过程质量控制

In a water canal project: Trimble's excavator control system allows 100% precision while 20% reduction of project duration

南水北调焦作段：该项目部采用了Trimble提供的挖掘机控制系统，精度完全满足工程验收标准，替代修坡机，施工速度比预期快20%。

## Summary 总结

- Precision GNSS enables automation  
精密GNSS成就自动化
- Automation: process control, quality, productivity, cost and environment protection  
自动化：过程控制、质量、产能、成本、环保
- This is just the beginning!  
这仅仅是一个开端！

**Thanks!**  
**谢谢！**
