Scientific Symposium

A scientific symposium on the theme “Use of the Equatorial Orbit for Space Science and Applications: Challenges and Opportunities”, jointly organized by the Committee on Space Research (COSPAR) and the International Astronautical Federation (IAF), will be held *today*, Monday, 12 February 2007, in Conference Room III, at 4:00 p.m., following the adjournment of the 659th meeting of the Scientific and Technical Subcommittee of the Committee on the Peaceful Uses of Outer Space.

The first session of the symposium will be chaired by Mr. Jean-Louis Fellous of COSPAR. Presentations will be made on “The use of the equatorial orbit for telecommunications and navigation satellites“, on “Long term, high-resolution observation of the extra-terrestrial solar output from 150 to 2500 nm“, on “The CNES/ISRO joint project on low inclination orbit to observe the low latitude water cycle“, and on “GEO Occupancy Analyzer Tool (GOAT)“.
