English and French only

**Committee on the Peaceful
Uses of Outer Space**
Scientific and Technical Subcommittee
Fifty-second session
Vienna, 2-13 February 2015
Long-term sustainability of outer space activities

**Proposal for additional text to be inserted in the Updated set
of draft guidelines for the long-term sustainability of outer
space activities (A/AC.105/C.1/L.340)**

Submission by Belgium

Belgium proposes the following additional text be inserted in document A/AC.105/C.1/L.340, in the section related to Guideline 35, as a third paragraph (p. 12 French version p. 11 English version).

Afin de réaliser les objectifs précités, les États et organisations internationales intergouvernementales sont encouragés à intégrer dans les études d'impact liées aux risques et aux menaces en termes de protection des infrastructures et des systèmes informatiques utilisés pour l'opération de systèmes satellitaires les aspects transfrontières et globaux de tels impacts et les conséquences que ceux-ci peuvent avoir pour d'autres États, notamment quant aux services fournis grâce à ces systèmes satellitaires.

Belgium's proposed English translation

For the purpose of achieving the here above mentioned objectives, States and international intergovernmental organizations are encouraged to integrate in the impact assessment related to risks and threats in connection with the protection of infrastructure and computer systems used for the operation of satellite systems transfrontier and global aspects of such impacts and the consequences of those impacts for other States, notably with regard to services provided through those satellite systems.
