**Committee on the Peaceful
Uses of Outer Space**
Scientific and Technical Subcommittee

Study on the possibility of creating an international entity to provide for coordination and the means of realistically optimizing the effectiveness of space-based services for use in disaster management

Addendum

1. The final report of the ad hoc expert group established to conduct a study on the possibility of creating an international entity to provide for coordination and the means of realistically optimizing the effectiveness of space-based services for use in disaster management is contained in document A/AC.105/873, making it available to all Member States. That document should be read together with document A/AC.105/C.1/L.285.
2. The final report contains the results of the consultations carried out during the forty-ninth session of the Committee on the Peaceful Uses of Outer Space, in 2006, and includes a revised workplan, an updated list of required resources, a proposed new name for DMISCO and a proposal for the implementation of the entity, based on the commitments received from Member States.
