**Committee on the Peaceful  
Uses of Outer Space**  
Fifty-seventh session  
Vienna, 11-20 June 2014  
**Report of the Scientific and Technical Subcommittee  
on its fifty-first session**

**Suggested amendments to the document “Proposal for a  
draft report and a preliminary set of draft guidelines of the  
Working Group on the Long-term sustainability of outer  
space activities” (A/AC.105/C.1/L.339)**

**Proposal submitted by Pakistan**

Pakistan suggests the following amendment to the existing draft guidelines:

“Outer space is a common heritage of mankind and the community of nations must support any instrument and process which contributes to the safety, security and sustainability of outer space activities, while rejecting militarization of outer space and placement of any kind of conventional and/or nuclear weapons in outer space.

Space-faring nations should assist the new entrants towards the implementation of space debris mitigation measures through provision of Conjunction Assessment Risk Analysis (CARA) systems, Situational Awareness Systems for live monitoring of space objects and arranging financing of projects to absorb additional costs incurred.”
