GNSS education experience in Italy

Fabio Dovis
Politecnico di Torino
Navigation Signal Analysis and Simulation Group

COPUOS meeting – Vienna, June 11, 2012
It is well known that Global Navigation Satellite System represent one of the main topics for R&D worldwide.

Modernisation of GPS and GLONASS, development of Galileo and Beidou as well as several regional systems are taking place.

It’s a global process that involves industry and research institutions and it will enable applications with a relevant impact on the life of citizens.
The “Education, Research and Innovation in GNSS – ERIG – “ project funded by the GNSS agency of the EC, showed how in Europe there is a lack of education and training in this field

• Solid education is the baseline for innovation development

• In Italy since 2004, Politecnico di Torino put great attention to the training of highly specialized technicians
  ▪ Civil use of GNSS
  ▪ System engineers
  ▪ Application developers
Specializing Master on Navigation

The Master on Navigation and Related Applications aims to train specialists and technicians able to operate in GNSS both at core system and services level.

A joint initiative of Politecnico di Torino and ISMB, with the support of INRIM and the UN-Office for Outer Space Affair.

“Istituto Superiore Mario Boella (ISMB) and Politecnico di Torino of Italy have established a long term fellowship programme which will provide scientists and specialists from developing countries with an opportunity to receive a Master degree in Navigation and related applications.“

United Nations Vienna, June 2004
Structure of Education in Italy

The Italian University system after 1999

- Pre-University Education (13 years)
- Laurea (Bachelor of Science (BS) (3 years)
- Laurea Specialistica (Master of Science (2 years)
- Master I livello (Specialising Master I level (1 year)
- Master II livello (Specialising Master II level (1 year)
- Dottorato (PhD (3 years)
- Laurea Specialistica (Master of Science (2 years)
- Laurea (Bachelor of Science (BS) (3 years)
- Pre-University Education (13 years)

COPUOS meeting – Vienna, June 11, 2012
Overview of the Spec. Master program

The Master lasts 1 year:
- Classes over 3 quarters (50 ECTS)
- The fourth quarter is devoted to an internship to be carried out in a company (20 ECTS)
The agreement among Politecnico di Torino, ISMB and UN-OOSA covers the following aspects:

- **Master Organization**
  - The Masters programme has been organised with the co-operation of officers of UN-OOSA

- **Contribution to the Master Curriculum definition**
  - The program of the courses has been prepared by the Masters Scientific Committee and discussed with the UN-OOSA representatives

- **Master Promotion**
  - The Masters and the Fellowship initiatives are promoted through the UN web site and in all the UN Educational Centres in the world

COPUOS meeting – Vienna, June 11, 2012
Details on UN/Italy Fellowship

The agreement among Politecnico di Torino, ISMB and UN-OOSA covers the following aspects:

- **Student Selection**
  - 4-5 students are selected yearly by UN through the UN Regional Educational Centres

- **Financial Support**
  - The students that are selected by UN receive a scholarship by ISMB to attend the Master

COPUOS meeting – Vienna, June 11, 2012
The Academia/Industry Cooperation

Companies contribution:

- Seminars
- Visits
- Internships for Pilot Projects
- Teaching in courses

Companies (27%)

INRIM (14%)

POLI-TO (36%)

ISMB (23%)

Teachers’ affiliation

COPUOS meeting – Vienna, June 11, 2012
A truly international environment

• The Master is an interesting international environment for students and teachers

• It attracts students from all over the world

• All classes are taught in English to ease international attendance

![Bar chart showing student distribution by continent]

- AFRICA: 10
- EUROPA: 28
- ASIA: 55
- AMERICA: 26
- LATIN: 1
- OCEANIA: 0
The G-TRAIN Project

- Based on the experience of the MNRA Politecnico is coordinating the G-TRAIN project funded by the European Community's within the 7 Framework Programme

- Partners:
  - ENAC – France
  - ISAE – France
  - UniBwM – Germany
  - ISMB - Italy
G-TRAIN Objectives

• Strengthen **top level education** in the field of GNSS

• Set up a **framework** for higher education addressing different educational initiatives as well as networking activities in GNSS education
G-TRAIN goals

- Strengthening the Specializing Master in Navigation and Related Applications for long term professional education
- Creation of a collaborative MSc in GNSS managed by ENAC with the cooperation of other partners
- Supporting Ph.Ds training and networking
  - Specific training events for PhDs in GNSS
- Creation of the Satellite Navigation University Network

COPUOS meeting – Vienna, June 11, 2012
G-TRAIN outcomes and impact

II cycle of Bologna process
- Teachers
- Students
- Supporting Initiatives
- Master of Science
- GNSS Technicians

Specializing Master
- Qualified Experts

III cycle of Bologna process
- Ph.D
- Researchers

To 3rd education cycle (Spec. Masters or Ph.D)

COPUOS meeting – Vienna, June 11, 2012
Concluding remarks

• **Education is crucial** to tackle the GNSS challenge for innovation creation, useful applications development, and let the user take a useful benefit of the space infrastructure

• There is still a urgent need to support the education step of the value chain in several areas of the world, in order to open the GNSS opportunity worldwide and not only to the countries of the service providers

• Italy aims at playing a main role thanks to the experience developed in these years
Thank you!
