**Committee on the Peaceful  
Uses of Outer Space****Information furnished in conformity with the Convention  
on Registration of Objects Launched into Outer Space****Note verbale dated 10 September 2013 from the Permanent  
Mission of the United States of America to the United Nations  
(Vienna) addressed to the Secretary-General**

The Permanent Mission of the United States of America to the United Nations (Vienna), in furtherance of the Convention on Registration of Objects Launched into Outer Space (General Assembly resolution 3235 (XXIX), annex), has the honour to transmit registration data on objects in outer space (see annex).

The United States has conducted an analysis of information provided by the Office of Outer Space Affairs of the Secretariat concerning space objects that remain unregistered and may be under United States jurisdiction and control in accordance with the Treaty on Principles Governing the Activities of States in the Exploration and Use of Outer Space, including the Moon and Other Celestial Bodies (General Assembly resolution 2222 (XXI), annex). The United States requests that the space objects contained in the annex to this document be placed on the Register of Objects Launched into Outer Space maintained by the United Nations, with the following information: international designator, name of the space object, date of the launch, location of the launch and general function of the space object.

In submitting this request, the United States notes that complete information is not available for all of the referenced space objects and that, consistent with its longstanding registration practice, the United States is not necessarily a launching State for each of the space objects it registers. The United States makes this request in the spirit of contributing to the practical effectiveness of the treaties and is providing information to the greatest extent practicable. As the United States collects further information in regard to these space objects, that information will be provided to the Secretary-General to update the Register as warranted.

## Annex

### Registration data on objects in outer space\*

All launches were made from the territory of the United States of America unless otherwise specified.

<i>International designator</i>	<i>Name of the space object</i>	<i>Date of the launch</i>	<i>Location of the launch</i>	<i>General function of the space object</i>
1986-014H	USA 18	9 February 1986	—	Spacecraft engaged in practical applications and uses of space technology such as weather or communications
1989-072A	USA 45	6 September 1989	—	Spacecraft engaged in practical applications and uses of space technology such as weather or communications
1990-031A	USA 56	11 April 1990	—	Spacecraft engaged in practical applications and uses of space technology such as weather or communications
1990-031B	USA 57	11 April 1990	—	Spacecraft engaged in practical applications and uses of space technology such as weather or communications
1990-031C	USA 58	11 April 1990	—	Spacecraft engaged in practical applications and uses of space technology such as weather or communications
1991-076D	USA 76	8 November 1991	—	Spacecraft engaged in practical applications and uses of space technology such as weather or communications
1991-076E	USA 77	8 November 1991	—	Spacecraft engaged in practical applications and uses of space technology such as weather or communications
1993-058B	ACTS	9 December 1993	—	Spacecraft engaged in practical applications and uses of space technology such as weather or communications
1994-040A	Panamsat 2	8 July 1994	Kourou, French Guiana	Spacecraft engaged in practical applications and uses of space technology such as weather or communications
1995-057A	USA 114	22 October 1995	—	Spacecraft engaged in practical applications and uses of space technology such as weather or communications
1995-069A	Galaxy 3R	15 December 1995	—	Spacecraft engaged in practical applications and uses of space technology such as weather or communications
1995-072B	Skipper	28 December 1995	Baikour Cosmodrome, Kazakhstan	Spacecraft engaged in investigation of spaceflight techniques and technology
1995-073A	Echostar 1	28 December 1995	Xichang, China	Spacecraft engaged in practical applications and uses of space technology such as weather or communications
1997-030A	Iridium 914	18 June 1997	Baikour Cosmodrome, Kazakhstan	Spacecraft engaged in practical applications and uses of space technology such as weather or communications

\* The registration data are reproduced in the form in which they were received.

<i>International designator</i>	<i>Name of the space object</i>	<i>Date of the launch</i>	<i>Location of the launch</i>	<i>General function of the space object</i>
1997-030B	Iridium 12	18 June 1997	Baikonur Cosmodrome, Kazakhstan	Spacecraft engaged in practical applications and uses of space technology such as weather or communications
1997-030C	Iridium 9	18 June 1997	Baikonur Cosmodrome, Kazakhstan	Spacecraft engaged in practical applications and uses of space technology such as weather or communications
1997-030D	Iridium 10	18 June 1997	Baikonur Cosmodrome, Kazakhstan	Spacecraft engaged in practical applications and uses of space technology such as weather or communications
1997-030E	Iridium 13	18 June 1997	Baikonur Cosmodrome, Kazakhstan	Spacecraft engaged in practical applications and uses of space technology such as weather or communications
1997-030F	Iridium 16	18 June 1997	Baikonur Cosmodrome, Kazakhstan	Spacecraft engaged in practical applications and uses of space technology such as weather or communications
1997-030G	Iridium 911	18 June 1997	Baikonur Cosmodrome, Kazakhstan	Spacecraft engaged in practical applications and uses of space technology such as weather or communications
1997-051A	Iridium 29	14 September 1997	Baikonur Cosmodrome, Kazakhstan	Spacecraft engaged in practical applications and uses of space technology such as weather or communications
1997-051B	Iridium 32	14 September 1997	Baikonur Cosmodrome, Kazakhstan	Spacecraft engaged in practical applications and uses of space technology such as weather or communications
1997-051D	Iridium 27	14 September 1997	Baikonur Cosmodrome, Kazakhstan	Spacecraft engaged in practical applications and uses of space technology such as weather or communications
1997-051E	Iridium 28	14 September 1997	Baikonur Cosmodrome, Kazakhstan	Spacecraft engaged in practical applications and uses of space technology such as weather or communications
1997-051F	Iridium 30	14 September 1997	Baikonur Cosmodrome, Kazakhstan	Spacecraft engaged in practical applications and uses of space technology such as weather or communications
1997-051G	Iridium 31	14 September 1997	Baikonur Cosmodrome, Kazakhstan	Spacecraft engaged in practical applications and uses of space technology such as weather or communications
1998-021A	Iridium 62	7 April 1998	Baikonur Cosmodrome, Kazakhstan	Spacecraft engaged in practical applications and uses of space technology such as weather or communications
1998-021B	Iridium 63	7 April 1998	Baikonur Cosmodrome, Kazakhstan	Spacecraft engaged in practical applications and uses of space technology such as weather or communications
1998-021C	Iridium 64	7 April 1998	Baikonur Cosmodrome, Kazakhstan	Spacecraft engaged in practical applications and uses of space technology such as weather or communications
1998-021D	Iridium 65	7 April 1998	Baikonur Cosmodrome, Kazakhstan	Spacecraft engaged in practical applications and uses of space technology such as weather or communications
