Affordable entry point to establish a capacity for development in the space domain;

Establishment of **novel industry** and **commercial businesses**;

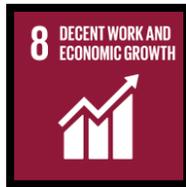

Training and education for engineers and project managers with transferable skills;

Acquisition of **technical capabilities**, with potential **spin-offs** into other industrial sectors → workforce development;

Opportunities for international space **cooperation**;

Participation in future **space exploration** efforts

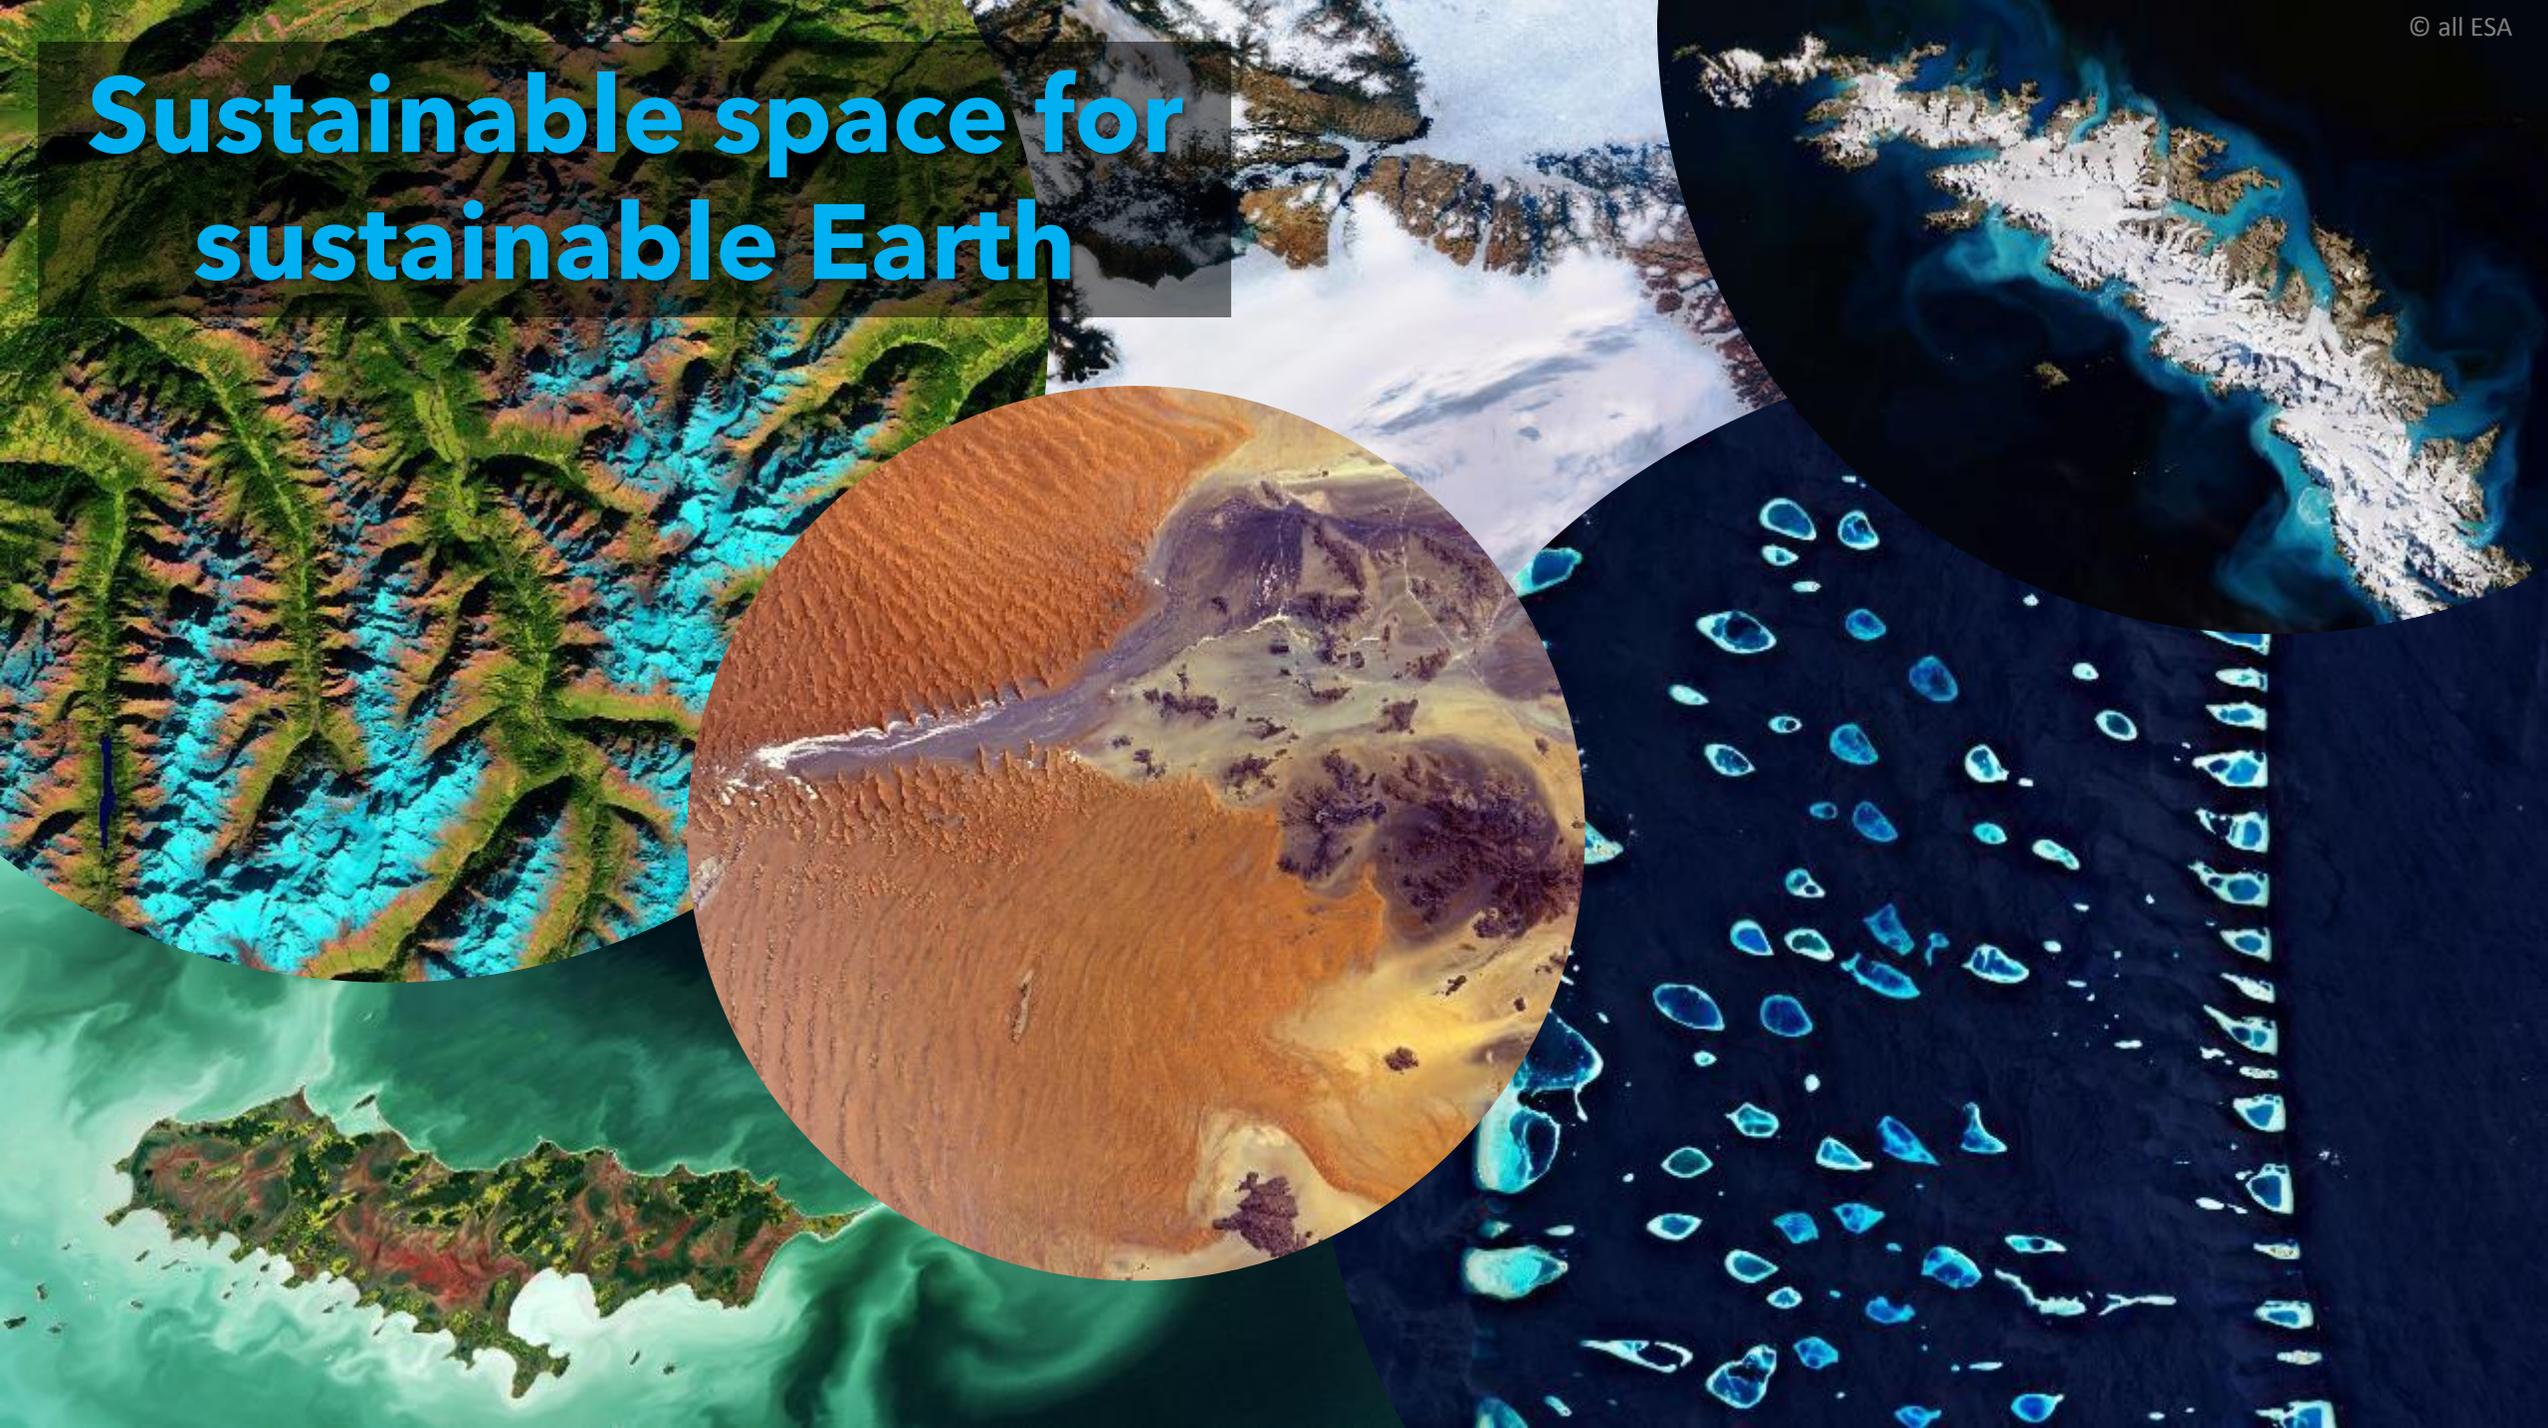

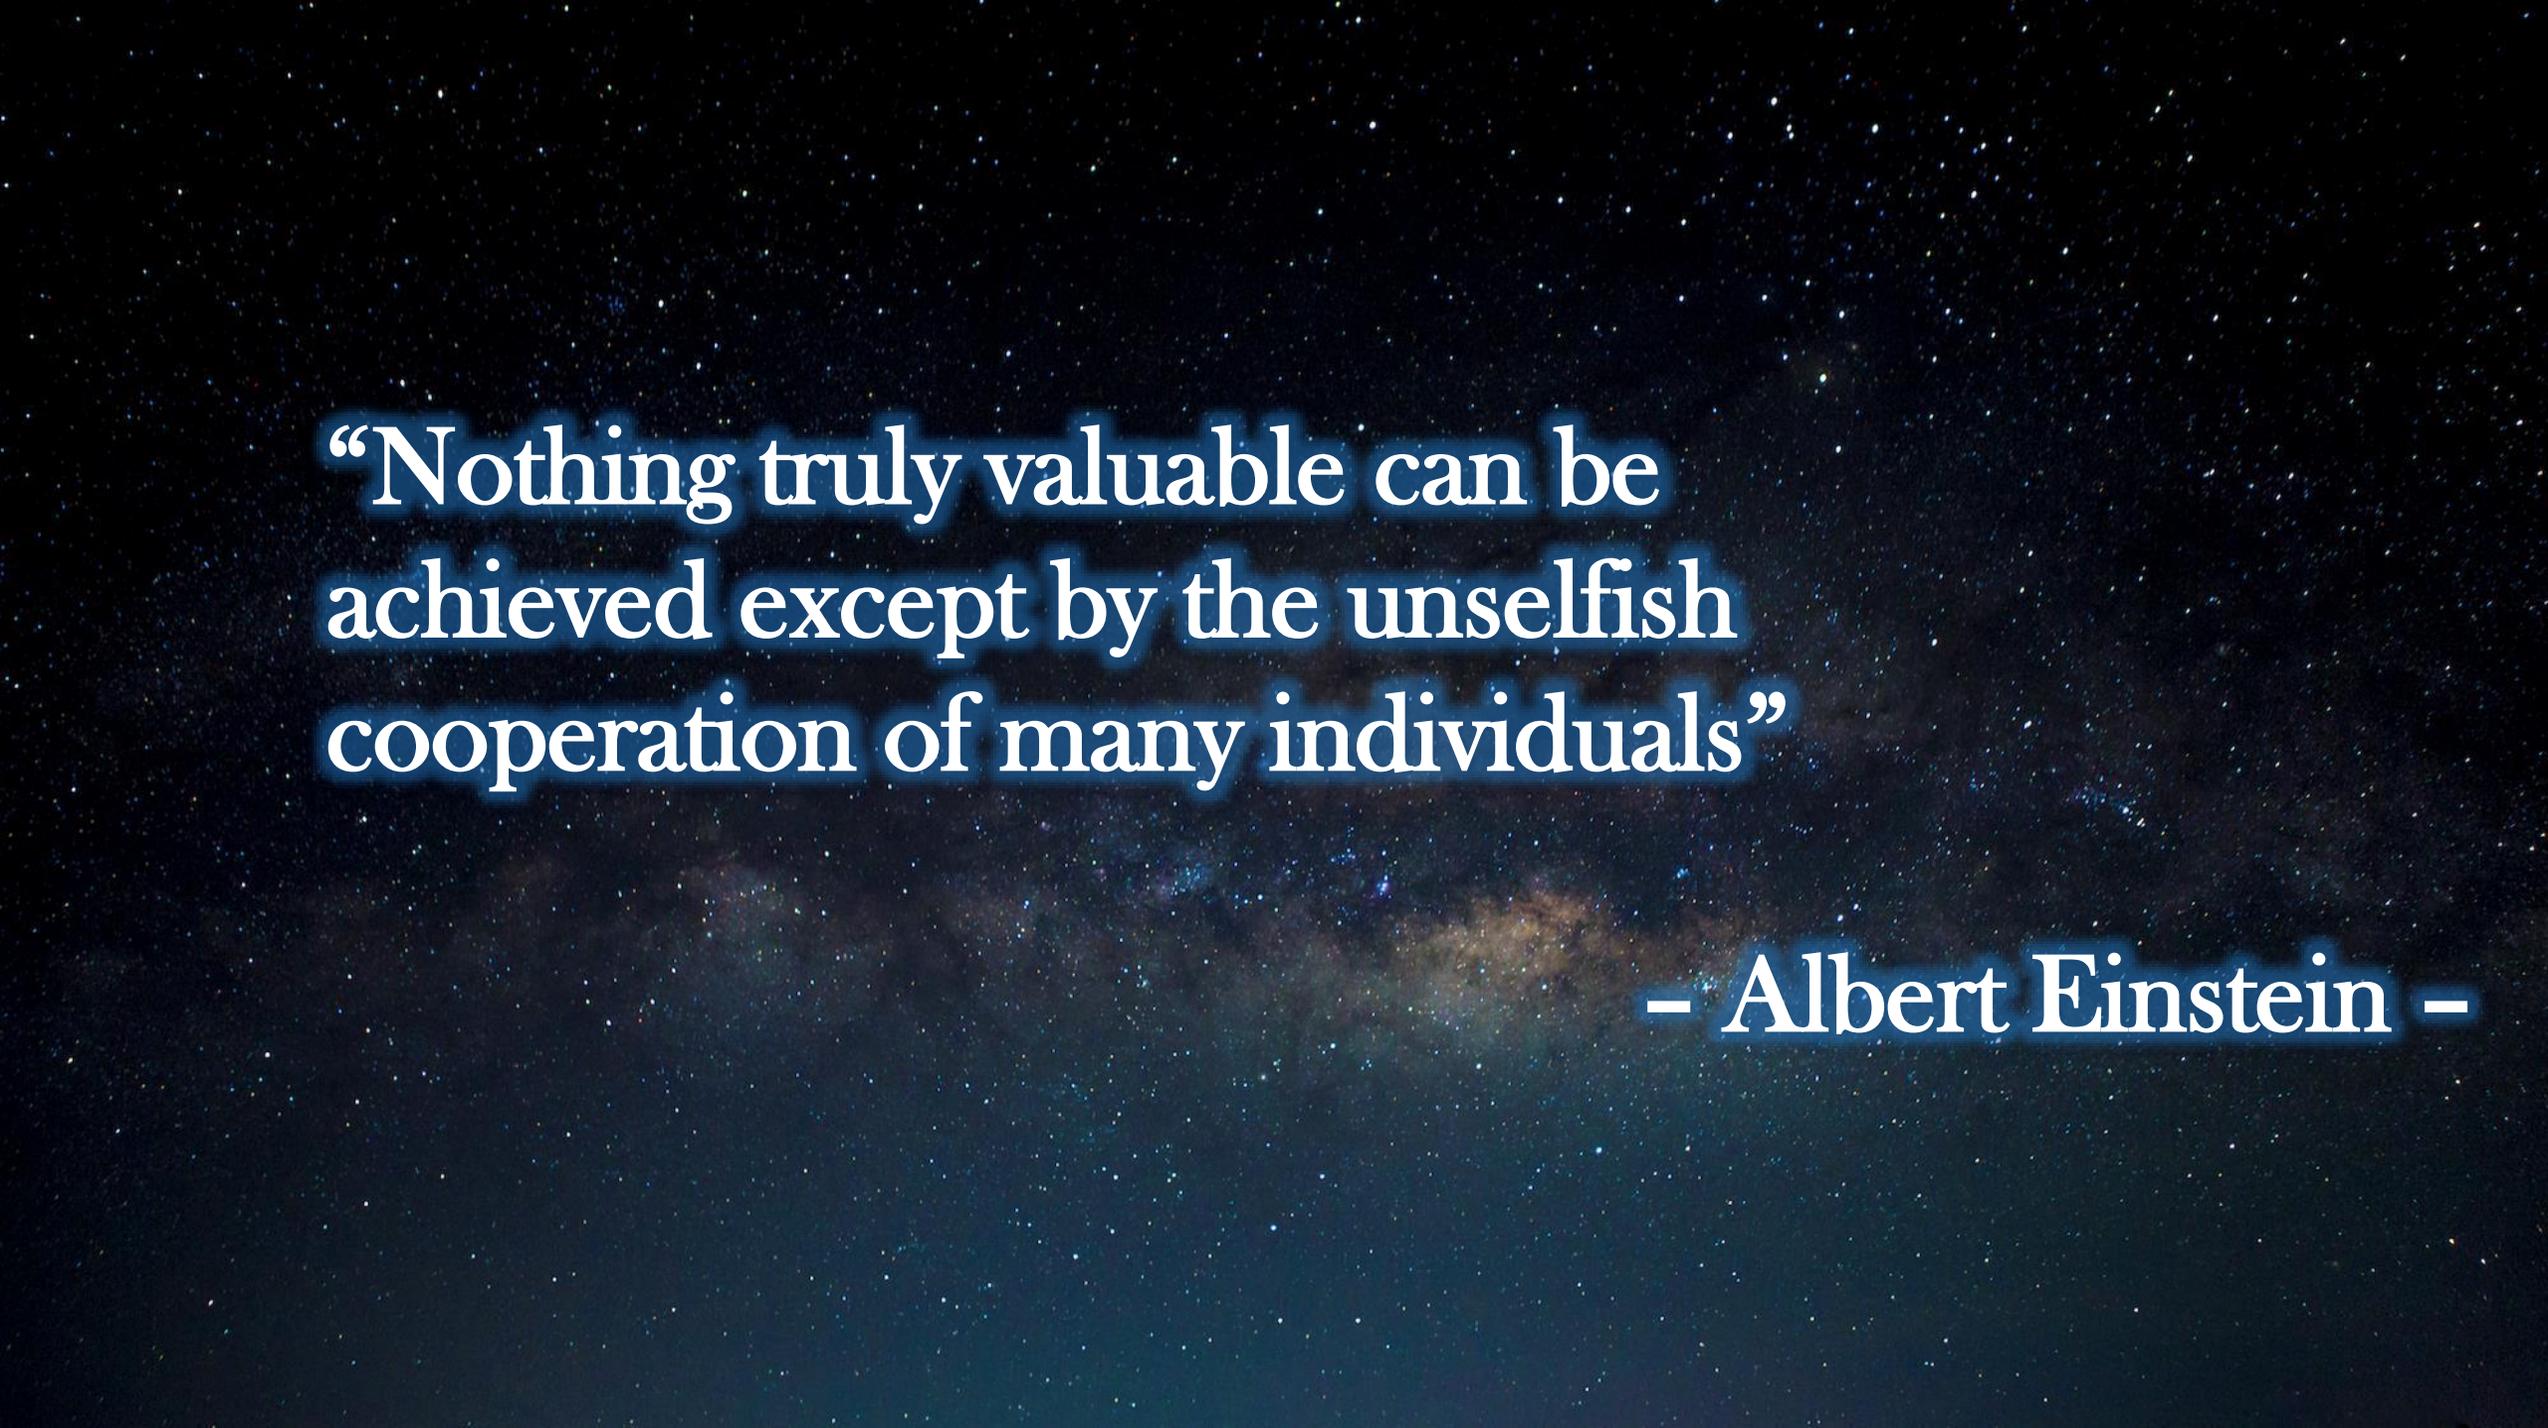

+ possible applications targeting other goals

VALUE PROPOSITION FOR DONORS

- ❑ Partner with United Nations to bridge the space divide and develop cross-cutting skills.
- ❑ Visibility of infrastructure and facilities
- ❑ Opportunities augmented and more impactful, having long-lasting impact
- ❑ Cost-efficient
- ❑ Development of responsible behavior
- ❑ Space for economy, society, accessibility and diplomacy

Sustainable space for sustainable Earth

“Nothing truly valuable can be
achieved except by the unselfish
cooperation of many individuals”

– Albert Einstein –
