

Working Group on the Long-term Sustainability of Outer Space Activities – Decisions by the Working Group at the sixty-seventh session of COPUOS

Non-paper by the Chair of the Working Group on the Long-term Sustainability of Outer Space Activities

Note: The paragraphs for consideration by Working Group members are drafted as they could appear in the final report of the session.

Already agreed at the first formal meeting of the Working Group:

1. The Committee noted that the Working Group had agreed to use the tables in the non-paper by the Chair dated 19 June as a basis for subsequent substantive discussions working through the challenges to the long-term sustainability of outer space activities.

Possible further decisions that could be taken by the Working Group at its final formal meeting on Wednesday, 26 June 2024:

2. The Committee noted that the Working Group had agreed that Working Group members would fill the tables, focusing on the challenges and justifications, to the extent practicable, in the intersessional period, and send related written inputs to the Chair and the secretariat by 23 August 2024.

3. The Committee noted that the Working Group had agreed that it would hold an informal online meeting in the September/October 2024 period. The Chair and the secretariat would compile and circulate the consolidated inputs on the working tables in advance of the intersessional meeting to support the intersessional discussions.

4. The Committee noted that the Working Group had agreed that the draft report to be prepared by the Chair of the Working Group before the end of 2024 (see [A/AC.105/1258](#), annex II, para. 18) would be based on the outcomes of the intersessional meeting.
