

The Saudi Space Agency

Cordially invites you to attend the side event:

Toward a Cleaner Orbit: Advancing Global Cooperation on Space Debris

Held on the sidelines of the 68th session of COPUOS

25 June 2025

9 AM – 9:50 AM

Press Room, Vienna
International Center

Networking and Knowledge Exchange

This event underscores the Kingdom of Saudi Arabia's growing role in advancing the sustainability of outer space activities. With a dedicated focus on space debris mitigation, the session will spotlight national efforts that promote responsible conduct in space and contribute to safeguarding the shared space environment for future generations.

Highlights of the Side Event:

- **Preview of the 2026 Space Debris Conference:**

Saudi Arabia will host the second international gathering to foster global dialogue and drive coordinated action on space debris mitigation and space traffic management.

- **Launch of the SDC26 Competition:**

A global innovation competition inviting researchers and innovators to submit transformative solutions for orbital debris reduction and long-term space sustainability.

- **Unveiling of the Centre for Space Futures' Policy Paper:**

A forward-looking policy paper on orbital debris, that offers actionable recommendations integrating policy, technology, and financial methods to drive sustainable space operations.

We look forward to seeing you at the event
