Intervention made by
the Delegation of the Republic of Indonesia
on the Agenda Item 12 : General exchange of views on the
legal aspects of space traffic management

at the 60th Session of Legal Subcommittee of the United
Nations Committee on the Peaceful Uses of Outer Space

Vienna, 31 May – 11 June 2021

Madam Chair,

Recognizing the intensification of space activities has created new challenges in ensuring the security, safety, sustainability, and stability of the space environment.

Indonesia supports the discussion of the space traffic management framework by encouraging the implementation of the guidelines for the long-term sustainability of outer space activities accompanied by an emphasis on efforts to share information and coordination among space actors internationally to increase space situational awareness globally.

Thank you.
