

Agenda 8. Capacity-building in Space Law
By. Ms. Ida Ayu Tita Rahmawidiani

Thank you Madam Chair,

Indonesia attaches to the importance of continuous capacity building in policy and space law provided by UN bodies. Indonesia is of the view that space law is one of the instruments that can be used to ensure peaceful and beneficial space activities for national development.

Indonesia takes note that the secretariat constrains capacity-building budgeting due to the hybrid format of the UNCOPUOS sessions. As previously discussed in the STSC meeting, we would like to welcome further explanation of the UNOOSA on the spending expenditure of hybrid meeting. Indonesia is of the view that back-to-the-normality session in in-person is required to build up capacity-building opportunity, particularly for emerging space countries.

While we are on the track to get back to the normality session in in-person, Indonesia hopes that UNOOSA can allocate the expenditure fund to intensify the capacity building programs.

Thank you
