Lunar Commerce & Economics Working Group

A Forum for International, Interdisciplinary Discussion

- Founded in early 2021 to promote discussion around potential lunar markets
- Original scoping activities involved over 200 people comprising 53 nationalities
- First package of work, the Lunar Commerce Portfolio, delivered by a team of 3 co-chairs, 9 market leads, and more than 30 international researchers, spanning more than 15 nationalities

MOJN VILLAGE ASSOCIATION

Introduction

What is it?

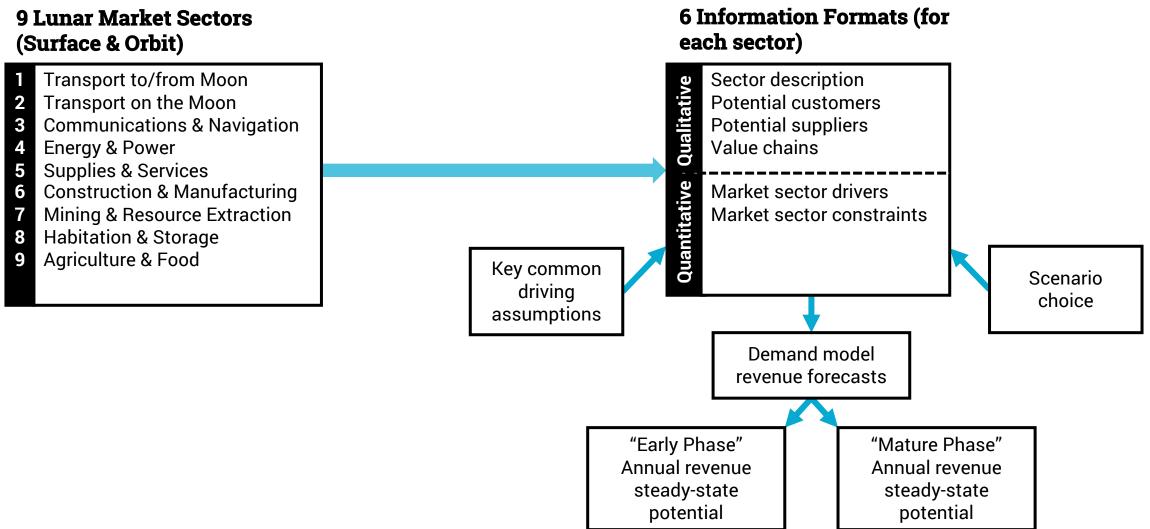

- Comprehensive report comprising 2 years work by international team of volunteer analysts
- Uses public domain sources, and is fully referenced
- A descriptor of lunar economic markets, their suppliers, customers, and value chains
- A model of lunar, commercial markets and interactions

Who are its intended users?

- Businesses, investors, insurers
- National space agencies
- International bodies and regulators

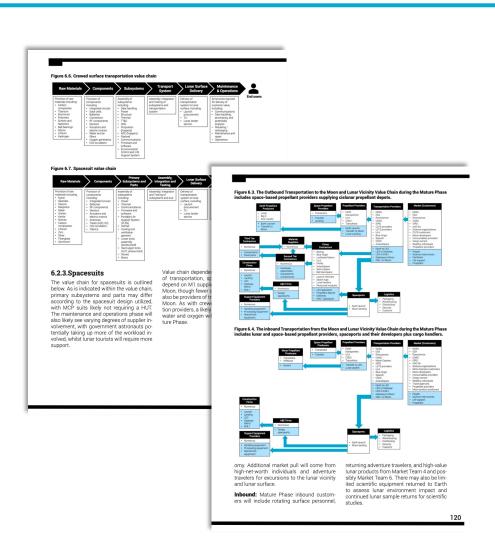

MOJN VILLAGE ASSOCIATION

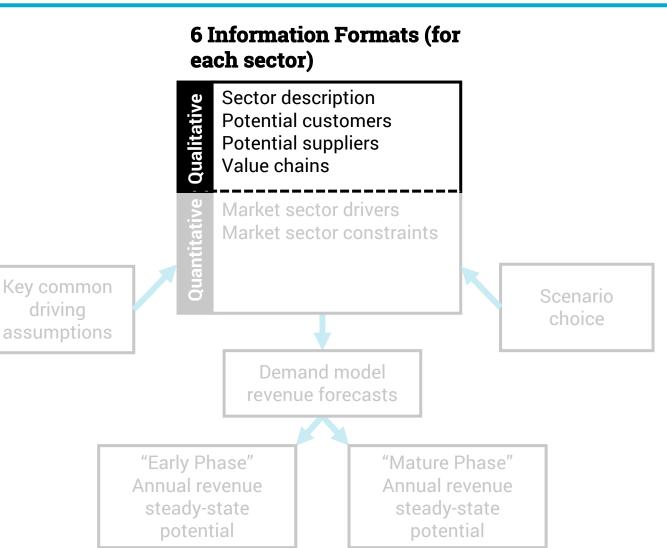

Approach

Approach

MOJN VILLAGE ASSOCIATION

Common Driving Assumptions

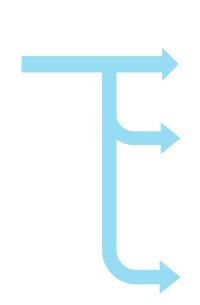

Assumption	Early	Mature
Annual personnel missions	1 – 9	1 – 40
Annual cargo missions	0	40 – 1
CLPS-like missions per year	2.5	2.5
Resident people on surface	2 – 4	40 – 120
Resident people in orbit	2 – 0	0
Number of bases	0	2 – 4
Tourists in lunar orbit	4	100 – 3,200
Tourists on lunar surface	0	10 – 125

Phases

- Early Phase: From now to 2030
- Mature Phase: That period when there is a permanent human presence on the Moon, selfsustainable with the necessities of life, and not dependent for them on a logistical supply chain of deliveries from the Earth

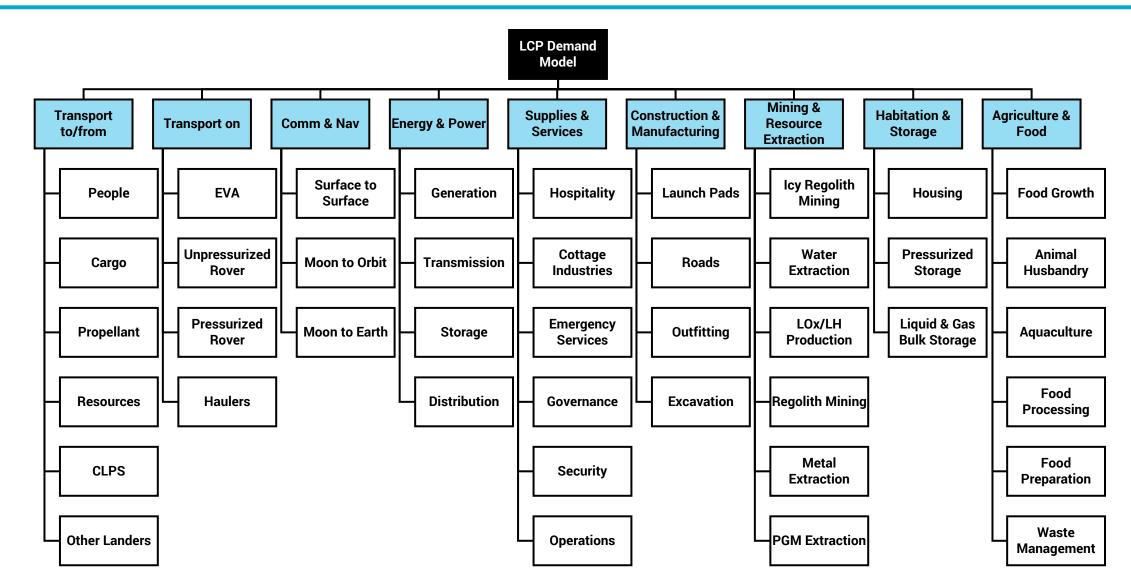

Scenarios

- Sorties: Continuous campaign of single missions to various locations
- Research Stations: One or more stations similar to McMurdo Station in Antarctica
- Sustainable Community: At least one permanent human presence on the Moon self-sustainable with the necessities of life independent from Earth
- Exports to Earth: Moon is fully open for business. Financial returns provided by export of PGM's, KREEP, He3, etc., to Earth.

Demand Model Sums Across Market Teams

Results & Next Steps

MODN VILLAGE ASSOCIATION

Version 1.0 Results

- For the Mature Phase, aggregated total revenue numbers range from an average annual \$4B ("Sorties" scenario) to approx. \$31B per annum ("Resources for Earth" scenario), depending on the external factor changes
- Considerable uncertainty remains
- Results particularly sensitive to assumptions around number of people in orbit and on the surface, and to the assumed export demand for resources
- There is a need for statistically valid market research e.g., for lunar space tourism
- There is a need for putting experimental test results in the public domain e.g., related to mining yields

Results & Next Steps

MOJN VILLAGE ASSOCIATION

Next Steps

- Working partnership with NDA Bocconi's Space Economy Evolution Lab: An independent research center which offers a multidisciplinary perspective within the space sector
 - Improve data and assumptions
 - Explore policy implications
 - Provide tailored analysis for industry
- Feedback requested from user community (Lunar Commerce User Group)
- Focused efforts at improving data and assumptions e.g., through focused market research efforts
- Subsequent updates of the Lunar Commerce Portfolio will be issued, as data sources are improved
