

Side Event at the 62nd Session of the UN COPUOS STSC

# Preserving Our Celestial Heritage: Dark and Quiet Skies

Vienna International Centre (VIC)  
Room M3, Feb 5th, 5:00pm

The delegations of **Spain and Chile** cordially invite you to join this side event on the protection of **Dark and Quiet Skies**. This initiative is crucial for preserving astronomy and the night skies from increasing light and radio frequency pollution from space activities.

With representatives from industry, academia and diplomats, the event will highlight the collaborative efforts of the **Group of Friends for the Dark and Quiet Skies**, with an introduction to the **Conference Room Paper (CRP)** developed for this STSC session.
