

# Easy on-line gamma-ray analysis: legacy archives and the prototypal AGILE-LV3 web tool

Carlotta Pittori, ASI Space Science Data Center and INAF-OAR

Do you have a favourite source or region in the sky and are you curious to know what is the **AGILE gamma-ray satellite** view of it during more than 10 years of observations?

Come to see the **Poster** and try the **AGILE-LV3 web tool** accessible also from the **ASI OpenUniverse web portal**:

<http://www.openuniverse.asi.it/>

It does not require any locally installed SW or calibrations!

Tested also with students
