BETTERING ACCESS TO A&A DATA IN THE UNIVERSITIES: THE IUCAA MODEL

presented by

Samir Dhurde
Inter-University Centre for Astronomy and Astrophysics, India
samir@iucaa.in

Mandate: An Eight-fold path

INTER-UNIVERSITY ACTIVITIES

- Vibrant Visitors Programme
- Serves faculty and students with interests in astronomy, astrophysics and related areas
- Meant principally for faculty and students from Indian Universities and Colleges
- About 100 Visiting Associates
- Senior Visitors ~ 400/yr, Students ~150/yr
- There are many overseas visitors, at the expert as well as user level

IUCAA VISITING ASSOCIATES

- Number of Associates ~150 Faculty from Universities and Colleges, mostly with Ph.D.
- Work spans a wide range including theoretical, observational and instrument related research.
- Associates often work with IUCAA faculty or other associates, and involve their students in the work.
- Several Associates use telescopes in India and abroad for their observational programmes.

University Students and Young Faculty

 A number of University students work closely with IUCAA faculty as official or non-official coguides. This is proving to be a very important scheme

 A number of young college teachers too work with IUCAA faculty on various frontier topics in astronomy

VISITING
ASSOCIATES
FROM
UNIVERSITIES
AND COLLEGES

Current Number: 155

WORKSHOPS/MEETINGS HELD BETWEEN JAN-JUNE 2017

Meetings/workshops organized at IUCAA:.

- 1. Topical Course in Computational Statistics and AstroStatistics, Jan. 2 10
- 2. Training School in Optical Astronomy with Large Telescopes, Jan. 16 27
- 3. Workshop on Data Intensive Science, Feb. 13 18
- 4. Workshop on Aspects of Gravity and Cosmology, Mar. 7 9.
- 5. Meeting on LIGO India: The Road Ahead III (LITRA III), Mar. 27 28.
- 6. Executive Committee Meeting of the IAU, May 10 12.
- 7. Meeting on LIGO India: The Road Ahead IV (LITRA IV), May 15 16.
- 8. UGC Refresher Course on Astronomy and Astrophysics, May 15 June 14

WORKSHOPS/MEETINGS HELD BETWEEN JAN-MAY 2017

WORKSHOPS AND MEETINGS

WORKSHOPS/MEETINGS

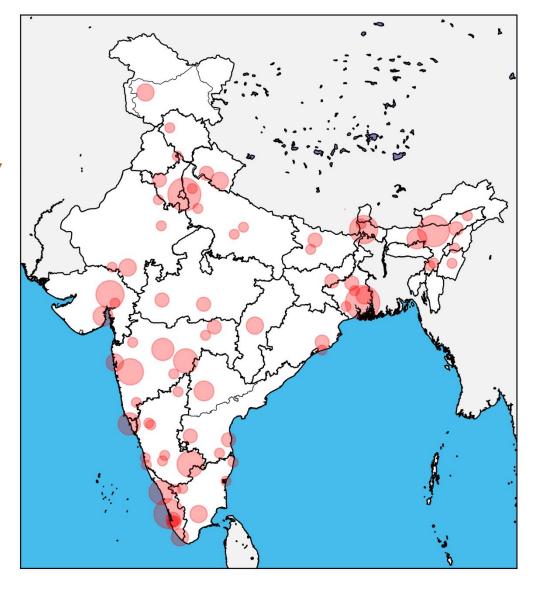

Meetings/workshops organized outside IUCAA:

WORKSHOPS
HELD IN THE
LAST 10 YEARS
FOR UNIVERSITY
FACULTY AND
STUDENTS
OUTSIDE IUCAA

Total Number of workshops: 206

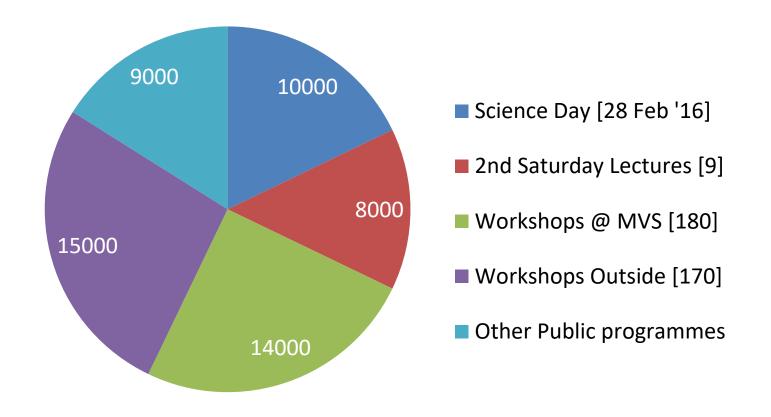

IUCAA RESOURCE CENTRES

- ◆ There are at present six IUCAA Resource Centres (IRC) located at Delhi, Kolkata, Raipur, Kochi, Siliguri and Udaipur.
- ◆ There are also three University Centres at Kozhikode, Nanded and Tezpur.
- ◆ There are four IUCAA Nodes for Astronomy & Astrophysics Development (INAAD) at four Colleges in Delhi, Gangtok, Pune and Kerala.
- ♦ We are in the process of re-organising these centres and activities with a new call of proposals

Science & Astronomy Outreach during 2016-17

Major Partnerships:

ASI-POEC, ISRO-TOT, India-TMT, LIGO-India, Vigyan Prasar, IAU OAO & OAD

Data and scientific community development

- Archival astronomical data provides a means to create and sustain a scientific community where indigenous observatories are not available.
- IUCAA is actively involved in getting the Universities to use the currently available tools and develop new ones to further this cause

VIRTUAL OBSERVATORY - INDIA

- IUCAA
- Persistent Systems Limited
- Ministry of Communications and Information Technology

IUCAA also hosts a NASA Astrophysical Data System mirror.

DATA AND SCIENTIFIC COMMUNITY DEVELOPMENT

Archival astronomical data provides a means to create and sustain a scientific community where indigenous observatories are not available.

21/Nov/2017

IUCAA development efforts

 IUCAA is actively involved in getting the Universities to use the currently available tools and in developing new ones to further this cause.

Example: a community working on top end astronomical X-ray data was developed in India where they published frontline research papers using archival data from international satellites such as RXTE, Chandra, XMM-Newton etc.

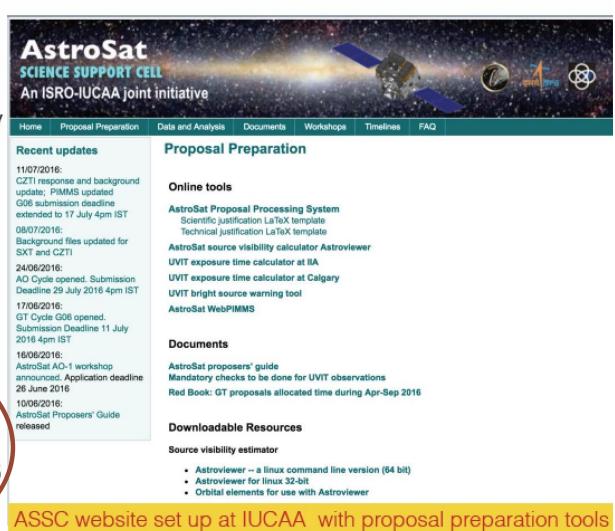

AstroSat Science Support Cell (ASSC)

- Set up in May 2016 via MOU with ISRO to support User community from Universities and Institutes
 - Proposal Preparation
 - Data Analysis
 - Maintain software/ CALDB
 - Develop advance analysis tools
 - Training workshops (5 per year)

& documents, data analysis, etc.

Data and scientific community development

 The community was developed by having a large number (more than 6 per year) of workshops all across the country. A critical component is hands-on sessions, which familiarize students on the handling and interpretation of large data.

Data and scientific community development

- The community was developed by having a large number (more than 6 per year) of workshops all across the country. A critical component is hands-on sessions, which familiarize students on the handling and interpretation of large data.
- After the launch of AstroSat, this community is now able to use their own satellite data. This was again achieved by having a large number of workshops with hands-on sessions.

ADVANCED LIGO - INDIA

सारथी (SAARATHI) GW DATA CENTRE @ IUCAA

सारथी (SAARATHI) GW DATA CENTRE @ IUCAA

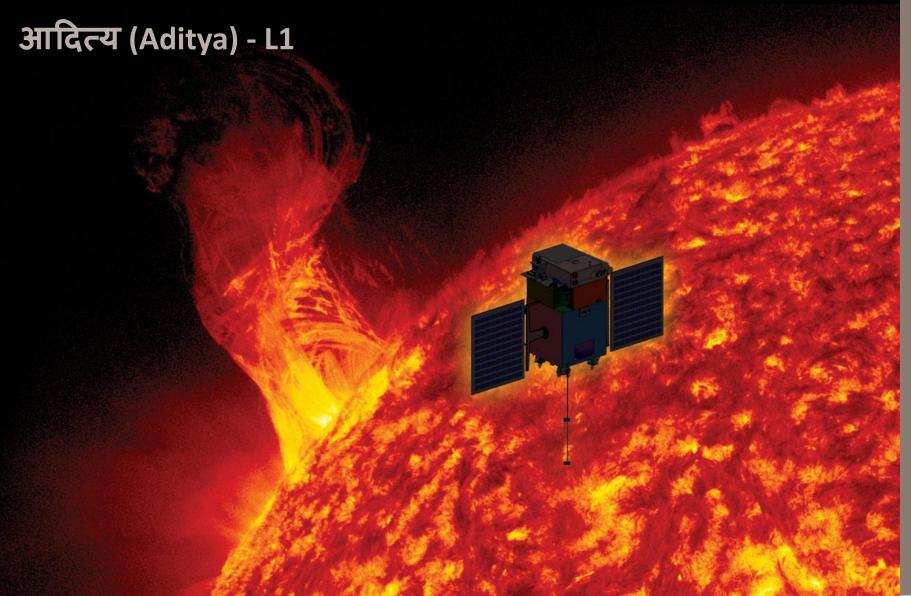

- Current IUCAA data centre: (oper. Jan 2013) 30Tf , 600 Tb [10Tf for GW]
- GWDA centre: ~100Tf, 2400 cores (LSC Tier2 level) [Jan 2016] Open to LSC at 50%. Used in second science run of Advanced LIGO
- Future Tier-1 LIGO data centre post LIGO-India operations
- All infrastructure for future expansion to ~500 Tf in place

THIRTY METRE TELESCOPE

Thank You!
