Institutions of 23 countries
Among others, tourism can become a major instrument for a **new alliance in defence of the quality of the nocturnal skyscape**. Responsible tourism can and should take on board the night sky as a resource to protect and value in all destinations. Generating new tourist products based on the observation of the firmament and the phenomena of the night, opens up unsuspected possibilities for **cooperation among tourism stakeholders, local communities, and scientific institutions**.

La Palma Declaration, 2007

UNESCO, UNWTO, IAU, UNEP-CMS, COE, SCBD, MaB, EC and Ramsar Convention.
Fundación Starlight Goals

- Protection of the night skies
- Smart lighting and energy saving
- Cultural dissemination of the astronomy
- Astro-Tourism Training, Advise & Consultancy
Starlight, a common heritage

One People — One Night Sky
Astronomy is for Everybody
What is Astro-Tourism?

Astro-tourism is a **sustainable and responsible** form of tourism that combines night sky **observation, outreach and leisure** activities related to astronomy.

**Trends:**

- Desire to enjoy stargazing
- **Interest in knowledge, particularly in astronomy**
- Demand for quality and expertise (Starlight training)
- **Selectivity of destinations**
- Infrastructures
- Search for authentic experiences
Where to go for Astro-Tourism?

- **Environmental requirements** (night and day sky quality) and others related to **natural, cultural and scientific** resources.
- Visitable, accessible and safe
- Infrastructure and services.
- Intelligent lighting strategies and regulations.
- Strategy and management of starlight-related resources.
- **Knowledge management** (research, innovation, education and information).
- **Astro-tourism program** macro-management.

Starlight Tourist Destinations: bringing for first time science and tourism together

They are scenarios that incorporate the preservation and observation of the sky as part of the natural, scenic, cultural and scientific heritage and encourage “Star Tourism”, promoting infrastructure, products, activities and training of specialized guides in sustainable tourism.

Astronomical and astrotouristic audits are required.
Other accredited Starlight modalities

Rural Hotel&Houses, Inns, Camps, … Stellar Parks, Wilderness, farms, activities. … Cultural Monuments

Starlight Lighting
Case study: La Palma Starlight Reserve & Starlight Tourist Destination

One of the best skies of the world, the island hosts the Roque de los Muchachos Observatory.

The first Starlight Reserve of the world, also named Starlight Tourist Destination in 2012. The STD are the only certification on astrotourism after restrictive audits (astronomical + astrotouristic).

UNESCO Biosphere Reserve
Sky Law in 1988 & La Palma Declaration in 2007

More than 120 Starlight Guides & Monitors.
Starlight wineries, trails and rural hotel & houses.
Astronomical viewpoints, hiking trails, visitors centers, G-Astronomy, etc.

Annual Income about 29.5M€ on astrotourism (total about 220M€).
Case study: Aoraki-Mackenzie International Dark Sky Reserve (New Zealand)

Astro-tourism had its major launch in Tekapo in 2004, although some small stargazing ventures were there from early 1990s.

AMIDSR was founded in 2012 with IDA accreditation

Visitor spend in the Mackenzie District now exceeds NZ$320m per year (in 2018)
What are the values of Dark Sky Oases?

- Scientific
- Wildlife, Ecology, Health
- Culture and Heritage
- Astrotourism
Resources for Astro-Tourism and Training

- 112 Starlight Guides
- 526 Starlight Monitor
- 35 Introduction in Astrotourism
- 37 Lighting Technicians
- 18 Starlight Auditors

> 15 nationalities
Benefits

- Overnight stay
- Deseasonalization
- The decentralization of supply
- Powerful tool against depopulation

In covid pandemic is emerging because:
- Open spaces
- Safe
- Attractive and quiet places
- Not overcrowded
- Personalised products
- Inclusive
- Excellence+knowledge+experience
Scientific/Astrotourism WG Affiliate Members UNWTO led by the Starlight Foundation

**41ST Plenary AAMM UNWTO,** 6-11 September 2021, St. Petersboug (Russia)

**I International Astrotourism Conference by Starlight,** 6-11 Sept. 2021, Évora (Portugal), included in AAMM UNWTO Agenda 2021

*Science and Tourism* in the horizon of the touristic industry and to reach the SDG’s of Agenda 2030
Lessons Learned

A sustainable astrotourism industry in an area depends strongly on **careful planning** to ensure that the growth of a tourism infrastructure does not imperil the resource that tourists come to experience.

It is important to **involve local communities** in decision making early.

Study examples from around the world to understand **best practices**.

The appeal of astrotourism is not limited to astronomy, but rather encompasses **all aspects of the nighttime experience** in a naturally dark place.

To be leaders in astrotourism, it is necessary to **innovate, diversify and sophisticate the offer**, personalizing it in each destination and promoting the development articularly.
