# **OUNARS**

MAPPING THE WORLD, SUPPORTING PEACE, SERVING HUMANITY

Geospatial services and maps tailored to support United Nations mandate and operations

## Data workflow in UN Maps

#### Earthquake in Morocco

 6.8 magnitude on Richter scale, damaging the area around Marrakech

- 2,900 deaths
- ~300,000 displaced people

- Source: Anfas
- 840,000 collapsed buildings

### Floods in Libya

 Caused by Storm Daniel, the biggest storm in North Africa ever recorded

- More than 4000 deaths
- ~10,000 displaced people

 2 dams destroyed in the city of Derna, Libya

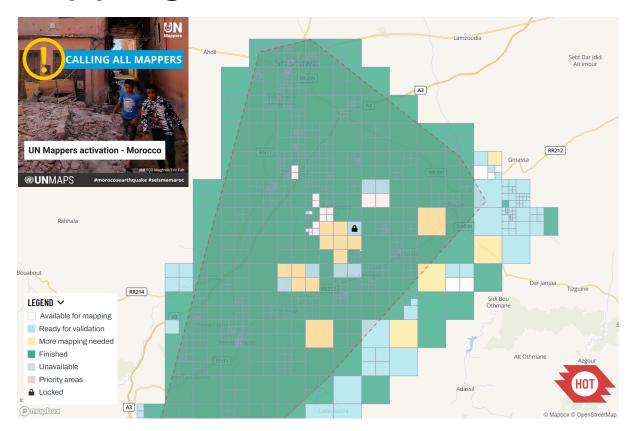

#### Quick data production for disaster response

#### Mapping contribution in Morocco

 Volunteers are activated via social media and edit collaboratively on OpenStreetMap (OSM)

### Mapping contribution in Morocco (training)

- Training of 15 GIS students from the Instituts Supérieurs des Professions Infimières et Techniques de Santé (ISPITS)
- Delivered online and in French
- Including topographic mapping techniques and field data collection through smartphones

# Mapping contribution in Libya

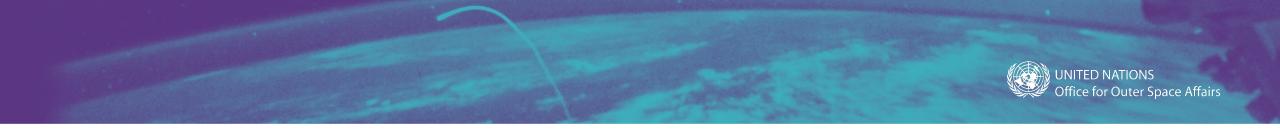

🥼 OpenAerialMap

Maxar 10500100363D0900 Libya 👱 🗈 🗙 🗄

- National OSM community coordinated the response
- Provided support on collaborative mapping projects
- Release of imagery by Maxar Open Data program and upload to OpenAerialMap
- Quick feedback loop with local rescuers to prioritize areas

# Mapping contribution in Libya (mapathon)

• 50 people online, 30 in Derna

### Artificial Intelligence to detect flooded area

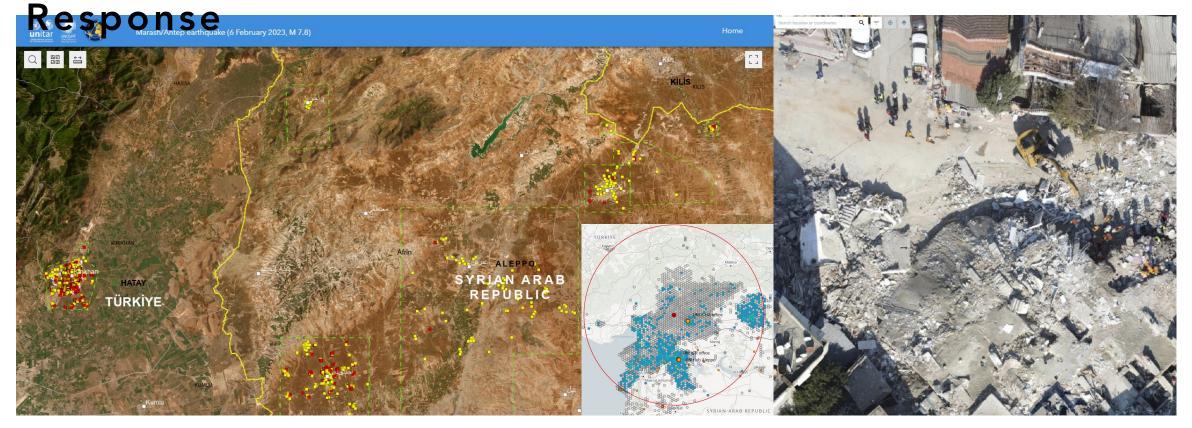

# How UN Maps contributed

- Immediately activated over 2600 volunteers to edit data in the affected areas
- Coordinated response with local mappers
- Built capacities of local rescuers in using open data in emergency
- Mapped, alongside with other organizations:
  - Buildings: 390,000 (Morocco) 55,000 (Libya)
  - Roads: 8,300 km (Morocco) 1,550 km (Libya)
  - Waterways: N.A. (Morocco) 3,800 km (Libya)
- Data available to any humanitarian actor for quick, actionable decisions

# Previous activities: Türkiye-Syria Earthquake
