

Trends in Precise Positioning and the Implications for Agriculture, Construction, Mining and Infrastructure Development in Australia

Matt Higgins

President of the IGNSS Society of Australia

and

Co-Chair of ICG Working Group D

Presentation Outline

- Re-cap on what is meant by Precise Positioning Infrastructure;
- Review of the strong need for Precise Positioning in Australia, especially in Agriculture, Construction and Mining;
- Interest also now growing in Energy Industry;
- But then a reality check on some of the problems with delivering various applications in a place like Australia;
- Finish on an optimistic note with some thoughts about one of the next big applications for Precise Positioning.

Continuously Operating Reference Stations as Key Components of Precise Positioning Infrastructure

Matt Higgins - ICG-6 Tokyo Japan September 2011
