FGCB Governance Structure

Recent FGCB Accomplishments

- Enhancing collaborations among various government departments on GNSS
- Participating in inter-departmental and international committees dealing with GNSS
- Developing recommendations concerning responsibilities of Canadian departments with respect to GNSS *I*nterference, *D*etection and *M*itigation issues
- Expanding cooperation on interference detection and mitigation, jammer enforcement, and geodetic network ground station coverage in Canada
 - Canada – U.S. Civil GNSS meetings
- Organizing FGCB Workshop on GNSS vulnerabilities
 - February 2014
 - April 2015

Next Steps

- Developing a GNSS Risk Assessment taking threats (e.g. spoofing, cyber) and CI interdependencies into consideration
- Explore options for improving communication of GNSS problems to users
- Monitoring developments related to GNSS backup
- Develop a communication plan to advise GNSS users on the vulnerabilities of GNSS
 - Organize workshop(s) with private sector to understand the dependency on GNSS and impact of GNSS disruptions on these services.

THANK YOU
