

**The Prince
Sultan Bin Abdulaziz
International Prize for Water**

Branches of the Prize

The Creativity Prize: open to any breakthrough made in any water-related field.

4 Specialized Branch Prizes:

- Surface Water
- Groundwater
- Alternative (non-traditional) Water Resources
- Water Resources Management and Protection

4th Award (2008-2010)

- The 4th Award of the Prize is open for nominations from now until 31 January 2010.
- Applications for nomination will be made online at: www.psipw.org

Topics for the 4th Award

1. **Surface Water:** "Innovative Methods for Rain and Runoff Water Modeling"
2. **Groundwater:** "Assessment and Control of Radioactive Contamination in Groundwater"
3. **Alternative (non-traditional) Water Resources:** "Innovative Methods for Water Production from Non-Traditional Water Resources"
4. **Water Resources Management and Protection:** "Remote Sensing and GIS Applications for Water Resources Management"

The Prize & Space

- The 4th topic of this round of the Prize focuses on the use of space technologies.
- The Prize Participated in organizing “**The International Conference on the Use of Space Technology for Water Management**” which was held in Riyadh in 2008.
- The Prize is committed to organizing & sponsoring conferences & workshops which address the application of space technologies to solving water-related problems.

4th Award (2008-2010)
