

# Introduction to Workshop

Sam Harbison

Chairman of NPS Working Group

# Follow-up to Safety Framework

- Multi-year work plan for 2010 – 2015 adopted by STSC in February 2010
- A major component of the work plan is a series of workshops, of which this is the second
- A further workshop is planned for 2013

# Objectives of Work Plan

- To promote and facilitate implementation of Safety Framework by providing information pertinent to challenges faced by member States and international intergovernmental organizations
- To identify any technical topics for, and establish the objectives, scope and attributes of, any additional work to further enhance the safe development and use of space NPS applications

# Outcome of 2011 Workshop

- Information and best practices about the implementation of Safety Framework shared
- Provided information of assistance to the NPS Working Group in considering any possible new areas of work
- Identified a significant challenge faced in implementing the Safety Framework in regard to accident scenario identification, and emergency preparedness and response

# Outcome of 2011 Workshop

- This challenge is addressed in two papers from the US at this Workshop
- There are three other presentations, from China, the Russian Federation and ESA, on the challenges faced in implementing the Safety framework

# Administrative arrangements

- Duration and interpretation facilities
- Length of presentations
- Questions for clarity
- General discussions
- Summary of proceedings and report of the NPS Working Group to the STSC
